Ibid	—		Minute of Council thereon — — —	9th do	No. 11	
1144	Minute by do —		Thinks Govt. has every reason to be satisfied with the course pursued in sending Mr. Maltby a Commissioner to Bellary, and that his report affords impartial and very satisfactory evidence of the benefits which have resulted from the measures of relief which were proposed by the Collr. and sanctioned by the Govt. during the drought which has lately so severely tried the district also that the appreciation of Govt. of the manner in which these onerous duties were performed, should be notified to the Collr. and by him to the Officers Civil and Military who were employed. Observes that the only point on which there are any grounds for objection is, that of the amount of Wages given, and that tho' he does not approve of it, yet it can be looked at in no more serious light than an error of judgment. Is of opinion that the people throughout the district should be informed of the great satisfaction Govt. has experienced in receiving a report so creditable to their Conduct throughout the hardships which they had to endure, and with reference to the numerous public Works brought to notice by Mr. Maltby which are required in this district. Observes that he has no doubt that the Works proposed would prove most beneficial not only for insuring future prosperity but as preventive to the serious calamities to which this district appears to be liable; also that there is one consideration of great importance, which is that the loss of property during this last season equals probably a large portion of the cost of the works in question and that it is well worth the grave deliberation of Govt. whether some means could not be adopted by which so desirable a result might be obtained as that of securing the population to a great extent.

from such heavy losses for the future; and for reasons stated, observes that he is disposed to propose and urge on the Honorable Court that loans should be raised for the purpose of insuring the early completion of plans of which there is good reason to suppose that they will tend materially to benefit the condition of the country - Thinks that though the amount of profit received at first might not be very large - yet there would be sufficient to pay a fair interest for the money and for accumulating a sinking fund, whilst the indirect benefit which would accrue would materially add to the wealth of the Country, and consequently to the revenue of Government - 8th Oct. 1854 | 6th March No. 7
